

# Nuclear Threat Initiative

## OUR VISION

A world safe from preventable global catastrophe

## OUR MISSION

To transform global security by driving systemic solutions to nuclear and biological threats imperiling humanity

## OUR CORE VALUES

### Uncompromising Integrity

We adhere to the highest standards of trustworthiness, mutual respect, and excellence.

### Intellectual Independence

We serve the global public interest unbound by national, political, or financial allegiances.

### Creative Collaboration

We forge innovative partnerships that multiply our impact.

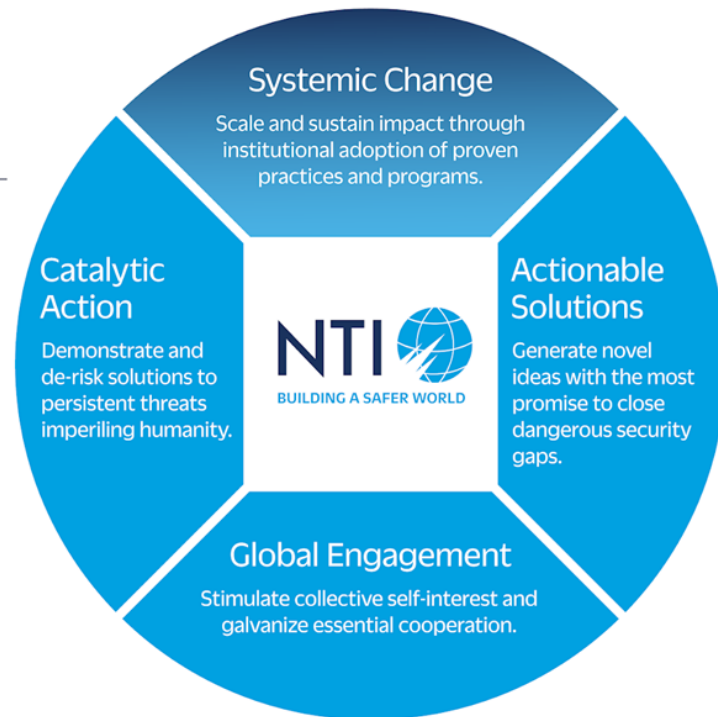

### Diverse Perspectives

We foster an inclusive, equitable culture that respects and lifts a range of voices and ideas, including those who have been traditionally underrepresented.

### Enduring Optimism

We share an abiding belief that a better future is possible.

## NTI IMPACT MODEL

## 2020 Estimated Global Nuclear Warhead Inventories

The world's nuclear-armed states possess a combined total of nearly 13,500 nuclear warheads; more than 90% belong to Russia and the United States. Approximately 9,500 warheads are in military service, with the rest awaiting dismantlement.

**Retired:**  
warheads no longer in the stockpile but remain intact as they await dismantlement

**Stockpiled:**  
warheads assigned for potential use on military delivery vehicles; includes active and inactive warheads.

**Strategic Deployed:**  
warheads on ballistic missiles and at U.S. bomber bases. *Numbers based on New START counting rules which attribute one deployed warhead per deployed heavy bomber no matter how many warheads each bomber actually carries.*
