

“Hiroshima for Global Peace” Plan Promotional Agenda  
(Planned period: FY2022-2024)

Peace Promotion Project Team  
April, 2022

## 1 Promotional agenda

Hiroshima Prefecture received recommendations in the form of the “Hiroshima for Global Peace” Plan from the “Hiroshima for Global Peace” Plan Formulation Committee comprised of experts from both Japan and abroad in October 2011. This plan describes the mission and the roles of Hiroshima, having been destroyed by the first atomic bomb in human history and then recovering from the ruins.

### Roles of Hiroshima proposed in the plan

(1) Supporting the roadmap for the abolition of nuclear weapons (2) Reducing the risks of nuclear terrorism (3) Developing human resources to build a peaceful international community (4) Accumulating research for nuclear disarmament and peacebuilding

Hiroshima Prefecture established a promotion committee for the “Hiroshima for Global Peace” Plan, and in cooperation with the City of Hiroshima and relevant organizations, is currently working on details of the plan. In 2012, guidelines were formulated to indicate the course of action for the plan’s initiatives and in 2013, plans to materialize immediate efforts in line with the guidelines were formulated as the “Hiroshima for Global Peace” Plan Promotional Agenda. Since then, it has formulated the plan to materialize efforts every three years.

Now, as the FY2019 formulation plan (FY2019-2021) comes to its completion, opinions of the promotion committee for the “Hiroshima for Global Peace” Plan will be put into consideration while the plan for the three years starting 2022 is formulated. Going forward, evaluations will be conducted as necessary based on the progress of the initiative.

#### ■ Dual symbolism of Hiroshima

★ “Belief in abolishing nuclear weapons” as the place that experienced atomic bomb destruction for the first time in human history

[Hiroshima’s strength]

• Being able to share the “belief in abolishing nuclear weapons” by describing experiences from humankind’s first atomic bombing and its realities

★ “Belief in recovery and hope for the future” as a place having recovered from ruins caused by the atomic bomb

[Hiroshima’s strength]

• The sharing of its “belief in recovery and hope for the future” by introducing experiences during the reconstruction process, from the historical ruins to present-day Hiroshima. Also, being able to record knowledge gained over the course of the reconstruction process and from medical treatment of atomic bomb survivors

## 2 Efforts thus far and moving toward the realization of a peaceful nuclear weapons-free global community

Hiroshima recognizes that the realization of a peaceful world free of nuclear weapons is its own mission and is working toward that goal in accordance with the “Hiroshima for Global Peace” Plan in a comprehensive manner, including efforts for the abolition of nuclear weapons, reconstruction and peacebuilding.

Toward the abolition of nuclear weapons, it has called for visits to Hiroshima and the site of the A-bombing by leaders in various fields by taking advantage of opportunities such as the NPT Review Conference. The visits by then President Obama to the site of the atomic bomb, which was

the first such occasion by an incumbent US president, and by Pope for the first time in 38 years, became a significant opportunity to greatly heighten international momentum for the abolition of nuclear weapons.

Furthermore, the visit by the President of the International Olympic Committee to the site of the atomic bomb in July 2021, prompted by the Tokyo Olympics, provided an opportunity to remind all people around the world of the significance of visiting the site. In addition, Hiroshima is currently working to attract the G7 to Hiroshima in 2023.

It is also conducting joint studies with world-renowned research institutions after signing partnership agreements with them, and is currently promoting the formulation of new security policies that do not depend on nuclear deterrence by starting the International Network Conference on Nuclear Disarmament Research.

Hiroshima also compiled and published the “Hiroshima Report,” summarizing the efforts toward nuclear disarmament and broadened its scope of activities, including the release of messages of recommendation from celebrities and publishing booklets for the public. Moreover, it continues to hold the “Hiroshima Roundtable,” a forum for multilateral talks surrounding nuclear disarmament in the East Asian region, and in 2019, it released the Hiroshima Urgent Appeal in light of the tense international situation over nuclear weapons in recent years.

As efforts to encourage individuals of the next generation to become part of reconstruction and international peacebuilding initiatives, Hiroshima provides opportunities for high school students to learn more about international issues such as nuclear disarmament and conflict resolution with the “Future Leaders' Program for Global Peace,” as well as the “Hiroshima Junior International Forum” in which high school students from both Japan and abroad hold discussions regarding international peace and deliver a message of peace.

In addition to enhancing online peace education courses by adding lectures and opening an English version, Hiroshima has newly concluded a partnership agreement on human resource development with international NGOs and ICAN, and runs the “Hiroshima-ICAN Academy” to train individuals to become global leaders capable of taking concrete action toward abolishing nuclear weapons and establishing international peace in the fields of diplomacy, the United Nations, and international NGOs.

In its efforts to build a sustainable peace support mechanism, Hiroshima held the “Hiroshima Business Forum for Global Peace” to discuss the relationship between business and peacebuilding from multiple perspectives and effectively disseminate information and stimulate global public opinion toward the realization of a peaceful world without nuclear weapons. It also announced the “Hiroshima Declaration” to announce the start of new actions with the aim of realizing “positive peace,” which is the premise for a democratic and free business.

As part of the commemorative events of the 75th Anniversary of the A-bomb and the end of the war, Hiroshima held the aforementioned “Hiroshima Business Forum for Global Peace” and the “event for dialogue for international peace ‘UN75 in Hiroshima’” and increased momentum for the abolition of nuclear weapons while expanding the base of supporters. In addition, it proceeded with formulation of the “Hiroshima Initiative,” a new proposal to strengthen efforts toward the realization of a peaceful world without nuclear weapons, announced the outline, and established the “Hiroshima Organization for Global Peace (HOPE)” as a promoter of the initiative. Furthermore, it has taken active measures to disseminate information by opening the “Hiroshima for Global Peace” website, which provides peace information to the world.

International public opinion regarding the abolition of nuclear weapons has been heightened in light of the Treaty on the Prohibition of Nuclear Weapons which came into effect in January 2021 and the first Meeting of States Parties to be held in 2022.

On the other hand, the gap between nuclear-armed and non-nuclear-armed states has further widened as the nuclear-armed states have become more dependent on nuclear deterrence and modernized their nuclear weapons, causing the world’s nuclear situation to remain critical. Moreover, due to the spread of COVID-19, international conferences such as the NPT Review

Conference have been inevitably postponed.

Amid such a severe situation, Hiroshima, the world's first nuclear bomb site, needs to exert its influence as a moral authority and have an impact on the world in order to create a more reliable movement toward the abolition of nuclear weapons.

In addition, in view of the advancing age of atomic bomb survivors, the role played by young people of the next generation will be important for constantly sending out the message for the abolition of nuclear weapons. It is also necessary to educate younger people who have the potential to play a central role in such activities in diverse settings around the world, and raise support among more and more people.

Furthermore, the efforts to build a peaceful world without nuclear weapons are long-term efforts that last for ten or twenty years. With Hiroshima as the base point, it is necessary to expand the base of supporters from prefectural residents/citizens in Japan as well as companies and NGOs from around the world. It is also necessary to create a system in which resources related to peace are continuously accumulated in Hiroshima from both Japan and abroad, and sustainable activities can be carried out.

■ Peace of mind, pride, and challenge — the “envisioned goal” and “target” set forth in the Hiroshima Vision

(Envisioned goal)

○ All countries, including nuclear-weapon states, have agreed to and are participating in a multilateral framework grounded in a new national security scheme that does not rely on nuclear deterrence. With this, a roadmap to a world free of nuclear weapons is now more clearly delineated.

○ Young people, having learned about peace from Hiroshima, participate continuously in various activities for peace such as recovery assistance in war-torn regions. Their actions are generating support throughout the world, influencing the global community and contributing to the realization of a world where people can live with peace of mind.

○ In conjunction with the increase in supporters, peacebuilding resources such as people, knowledge, information, and funds are flowing into Hiroshima from all parts of Japan and abroad. Hiroshima, recognized as a hub for international peace with the ability to help resolve peace-related issues, serves as a focal point for the world's aspirations for peace.

(Target) Global consensus on the elimination of nuclear weapons

Target in 2030: Adoption of a multilateral framework by all countries including nuclear-weapon states

■ Goals set in the action plan (FY2022-2024)

Establish a global environment/system with the aim of achieving global consensus on the elimination of nuclear weapons

### 3 Hiroshima Initiative

Promote the “Hiroshima Initiative,” a new proposal for enhancing activities toward the realization of a peaceful world without nuclear weapons on the occasion of the 75th anniversary of the atomic bombing

■ Outline

By formulating and promoting new proposals for the abolition of nuclear weapons, Hiroshima will reiterate its determination to abolish nuclear weapons, and call all countries, international organizations and civil society to take global actions toward the abolition of nuclear weapons based on the following four pillars, with the aim of contributing in specific ways to realizing a peaceful world without nuclear weapons.

1. Achieving a U.N. consensus on the goal of abolishing nuclear weapons
2. Strengthening global norms to reject nuclear weapons
3. Promoting nuclear disarmament and seeking a security system that does not depend on nuclear weapons
4. Creating a platform for collaboration

## 4 Course of action

### 1 Create a new strategy and multilateral framework to facilitate nuclear arms abolition

Toward the abolition of nuclear weapons, Hiroshima will promote the creation of new security policies to replace nuclear deterrence in collaboration with global peace research institutes, centered on the "International Network Conference on Nuclear Disarmament Research," and aim to form a multilateral framework for the realization of a peaceful world without nuclear weapons by garnering the endorsement of various countries.

#### (1) Creating a new security theory to replace nuclear deterrence

##### [Envisioned goal]

Theoretical substantiation for a specific security process to undertake for the abolition of nuclear weapons has been established in the international community.

##### [Main path ①]

- Make proposals for a new security system to replace nuclear deterrence

Centered on the "International Network Conference on Nuclear Disarmament Research," collaborate with international peace research organizations including the Stockholm International Peace Research Institute (SIPRI), the United Nations Institute for Disarmament Research (UNIDIR), and the Royal Institute of International Affairs (Chatham House) to develop proposals for a new security system to replace nuclear deterrence

##### [Main efforts going forward ①]

- Prepare policy proposals (drafts)

In order to bolster theoretical substantiation, prepare proposals (draft) for a security system to replace nuclear deterrence based on the results of joint research and new security approaches (FY2022-2024).

- Carry out research projects on new security approaches to replace nuclear deterrence.

Continue to carry out specific research on topics such as the reassessment of nuclear deterrence and the transition approach in order to establish a new security theory to replace nuclear deterrence, which will serve as the core of the policy proposals (FY2022-2024)

- Enhance the "Hiroshima Report," which investigates, analyzes, and evaluates efforts including initiatives for nuclear disarmament by various countries

- Review assessment items based on discussion of the NPT, etc. (FY2022-2024)

- Cooperate with international organizations, universities/research institutions, NGOs, etc. (FY2022-2024)

- Promote the dissemination of information to government officials of various countries as well as individuals and groups influential in shaping global public opinion through the distribution of reports and other materials (FY2022-2024)

- Continuously improve and promote the use of booklets with simple wording (FY2022-2024)

- Hold the "Hiroshima Roundtable," an opportunity for multilateral discussions at the non-governmental level on themes including nuclear disarmament (Track 2).

- Set up a subcommittee according to themes, etc. to create proposals to present at opportunities such as the NPT Review Conference (FY2022-2024)

##### [Main path ②]

- Disseminate proposals for new security policies to the international community

Proactively disseminate information through opportunities such as international conferences, and generate discussion in the international community and various fields

##### [Main efforts going forward ②]

- Penetrate into the international community

Disseminate research results and policy proposals (drafts) at opportunities such as the NPT Review Conference and the Meeting of States Parties of the Treaty on the Prohibition of Nuclear Weapons (FY2022-2024)

- Penetrate into Hiroshima prefecture/Japan

Disseminate information at events such as dialogues in collaboration with the United Nations at events organized by HOPe (FY2022-2024)

### (2) Create a multilateral framework to gain global consensus

##### [Envisioned goal]

The creation of a multilateral framework to gain global consensus on the abolition of nuclear arms has garnered approval from various countries.

[Main path ①]

- Approach the UN member states

Form a government-level negotiation entity which will serve as the central body for the creation of a multilateral framework, and approach the UN member states

[Main efforts going forward ①]

- Establish a Friends Meeting

Call on the UN member states that keenly support the abolition of nuclear weapons to participate, establish a government-level negotiation entity (Friends Meeting), and start lobbying through the Friends Meeting (FY2022-2024)

[Main path ②}

- Develop human resources for the shift in security policies

- Develop human resources who will contribute to the shift in security policies grounded in nuclear deterrence, and to nurture contributors to the government security sector

- Develop organizations and institutions that can cooperate in public relations and the dispatch of their personnel as participants, and expand the diversity of participants in human resource development projects

[Main efforts going forward ②]

- Invite young researchers and practitioners to Hiroshima

In the future, invite researchers and practitioners of the generation who will play a central role in the national security field to Hiroshima, and provide opportunities for them to see the realities of atomic bombing and learn about peace (FY2022-2024)

- Secure a diverse range of participants in the “Hiroshima-ICAN Academy”

- Carry out promotional activities to secure a diverse range of participants (FY2022-2024)

- Develop and implement programs in collaboration with security-specialized organizations, etc. close to the governments of nuclear-weapon states (FY2022-2024)

- Enhance existing courses

Further enhance the “Hiroshima Junior International Forum,” “Future Leaders' Program for Global Peace,” etc. and increase the number of participants (FY2022-2024)

## 2 Expand the base of supporters for our peace initiatives and work to get the world engaged

Increase global momentum for the realization of a consensus on the abolition of nuclear weapons by working/collaborating with different players in civil society and expanding the base of supporters for our peace activities

### (1) Expand the base of supporters and develop human resources

[Envisioned goal]

The base of supporters is expanding through collaboration with groups and projects around the world that are actively involved in the nuclear weapons issue.

[Main path ①]

- Prepare proposals for the realization of the Hiroshima Initiative

Draft proposals to expand the base of supporters in the international community

[Main efforts going forward ①]

- Enhance and disseminate the theory behind the linkage between nuclear disarmament and SDGs

Establish a theory behind the linkage between nuclear disarmament and SDGs, include it in the proposal, and disseminate it to the international community (FY2022-2024)

[Main path ②}

- Collaborate with NGOs/NPOs working toward the abolition of nuclear weapons

Collaborate with groups and projects that are actively involved in the nuclear weapons issue and facilitate networking with them

[Main efforts going forward ②]

- Launch an entity that seeks the involvement of civil society

Launch an issue group that includes the participation of groups that are actively involved in

the nuclear weapons issue or work to solve various international issues, start to get the international community involved, and support government-level negotiations (FY2022-2024)

[Main path ②]

- Increase the number of interested parties to expand the base of supporters

Continue to develop more international human resources for peacebuilding by expanding public relations activities and utilizing online resources, and promote the recruitment of next-generation human resources who are less interested in peace activities by creating an environment that facilitates participation.

[Main efforts going forward ③]

- Increase the number of interested parties

• Consider the establishment of programs that utilize digital technology with focus on the younger generation

(FY2022-2024)

• Hold “Hiroshima Lectures” by taking advantage of the “Hiroshima Roundtable” (FY2022-2024)

- Plan and implement new programs

Consider the establishment of the Global A-bomb Survivor Resource Library, etc. (FY2022-2024)

## (2) Collaborate with various players

[Envisioned goal]

Collaboration with various players involved in the solution of social issues has expanded, and outreach to the international community has been strengthened.

[Main path ①]

- Collaborate with various players that are actively involved in social issues

Take the opportunity of the various international conferences such as the United Nations High-Level Political Forum and COP to collaborate with groups working on various international issues such as climate change and pandemics

[Main efforts going forward ①]

- Launch an entity that seeks the involvement of civil society

Launch an issue group that includes the participation of groups that are actively involved in the nuclear weapons issue or work to solve various international issues, start to get the international community involved, and support government-level negotiations (FY2022-2024)

[Main path ②]

- Collaborate with people with global influence

Expand the base of support by disseminating peace efforts utilizing individuals who have strong abilities in this area.

[Main efforts going forward ②]

- Strengthen dissemination abilities through ambassador activities

Expand the base of supporters of young people and related organizations through participation in collaborative events by Peace Ambassadors and international conferences (FY2022-2024)

- Carry out campaigns in collaboration with international groups

Carry out campaigns such as #Cranes for Our Future, etc. and expand the base of supporters (FY2022-2024)

## (3) Continually spread a message of the abolition of nuclear weapons from Hiroshima

[Envisioned goal]

Many in the world, starting with leaders of various countries, have been asked to share their conviction for nuclear disarmament, and international public opinion regarding nuclear abolition has been heightened. (Initiatives led mainly by Hiroshima City)

[Main path]

- Convey the realities of an atomic bombing and appeal for the abolition of nuclear weapons

Have leaders from around the world deepen their knowledge and understanding of the realities of an atomic bombing by learning specific aspects of the actual immense and tragic

situations brought about by heat rays, blasts, and radiation from the use of nuclear weapons so that they are able to develop a firm anti-nuclear weapon sentiment Also help the general public gain the same kind of awareness so that global public opinion might be stimulated in order to encourage real action towards the abolition of nuclear weapons

[Main efforts going forward]

- Continue relaying the realities of an atomic bombing and appealing for the abolition of nuclear weapons (FY2022-2024)

Share awareness toward the abolition of nuclear weapons by taking advantage of opportunities such as the hosting of the Group of Eminent Persons meeting to be held in Hiroshima (FY2022-2024)

- Promote visits to Hiroshima by government officials and organizations from various countries as well as individuals and groups influential in shaping global public opinion

Strengthen efforts to use trips to Japan by political leaders and leaders in various fields as opportunities to have them visit Hiroshima (FY2022-2024)

- Invite international conferences to Hiroshima

- ・ Promote the invitation of international conferences, etc. on peace (FY2022-2024)

Invite and hold the G7 Summit, an international conference attended by world leaders (FY2023)

### 3 Implement reconstruction and peacebuilding initiatives that capitalize on Hiroshima's experience and resources

By utilizing the experience of rebuilding from the complete destruction caused by the atomic bombing and the symbolism of peace and hope which Hiroshima possesses, contribute to the recovery and growth of post-conflict areas and developing regions by providing people around the world with opportunities on a wide scale to learn about reconstruction/peacebuilding in collaboration with international organizations providing human resource development support such as UNITAR (United Nations Institute for Training and Research) Office in Hiroshima, JICA (Japan International Cooperation Agency) Chugoku Center, and Hiroshima International Center, as well as educational organizations in the prefecture

#### (1) Enhance the development of human resources for reconstruction and peacebuilding

[Envisioned goal]

Human resources contribute to the recovery and growth of post-conflict areas and developing regions based on Hiroshima's first-hand knowledge of reconstruction and peacebuilding.

[Main path ①]

- Collaborate with organizations providing human resource development support and academic institutions in Hiroshima Prefecture

Increase the number of participants by improving programs for human resource development and implementing new programs

[Main efforts going forward ①]

- Cooperate with UNITAR and JICA

Utilize the results of research into Hiroshima's reconstruction process to assist with peacebuilding projects by UNITAR and JICA and expand human resource development courses through means such as encouraging the establishment of new courses and seminars (FY2022-2024)

- Cooperate with institutions such as universities within Hiroshima and improve existing courses

- ・ Promote the utilization of reconstruction and peacebuilding research project results in Hiroshima (reports, booklets) by relevant organizations in the prefecture (prefectural universities, research institutes, international organizations, etc.) (FY2022-2024)

- ・ Further enhance the "Global Future School in Hiroshima" program for high school students to produce human resources who can contribute to international peace (2022-2024)

- ・ Further enhance the "Hiroshima Junior International Forum," where high school students from both Japan and around the world discuss international peace and deliver a message of peace, and increase the number of participants (FY2022-2024)

- ・ By taking advantage of the Internet, increase the online learning courses of "Think about Peace from Hiroshima" for learning about the realities of an atomic bombing as well as

international trends in nuclear power, and increase the number of participants  
(FY2022-2024)

Plan and implement new programs in collaboration with the UN Youth Champions for Disarmament, U-Peace, prefectural universities, etc.

[Main path ②]

- Increase the number of interested parties to expand the base of supporters  
Continue to develop more international human resources for peacebuilding by expanding public relations activities and utilizing online resources, and promote the recruitment of next-generation human resources who are less interested in peace activities by creating an environment that facilitates participation.

[Main efforts going forward ②]

- Increase the number of interested parties
  - Consider the establishment of programs that utilize digital technology with focus on the younger generation  
(FY2022-2024) (As above)
  - Hold “Hiroshima Lectures” by taking advantage of the Hiroshima Roundtable
- Plan and implement new programs  
Consider the establishment of the Global A-bomb Survivor Resource Library, etc.  
(FY2022-2024) (As above)

## (2) Promote international cooperation in medical care for the radiation-exposed

[Envisioned goal]

Human resources who have gained knowledge of the medical treatment of atomic bomb survivors that Hiroshima has accumulated are active in various parts of the world.

[Main path]

- Provide training to medical personnel capable of responding to radiation accidents and disasters  
Use the research results of medical treatments for atomic bomb survivors and radiation-caused disabilities to promote the training of medical personnel capable of responding to radiation accidents and disasters in various parts of the world.

[Main efforts going forward]

- Increase training to educate medical personnel capable of responding to radiation accidents and disasters via HICARE (Hiroshima International Council for Health Care of the Radiation-exposed)
  - Implement training for visitors from abroad and hold lectures for local residents as a hub for developing international human resources in the field of medical treatment of atomic bomb survivors and disseminating information on this field
  - Implement international medical training by utilizing the network with the IAEA (International Atomic Energy Agency)  
(FY2022-2024)
  - Dispatch medical students as interns to the IAEA and conduct visiting lectures at high schools as a project to develop the next generation (FY2022-2024)

## 4 Build sustainable peace-promoting mechanisms

Develop a sustainable peace support mechanism by gathering human resources, knowledge, information, and financial resources from around the world and promote global action toward the abolition of nuclear weapons by cooperating/collaborating with various players

In addition, in order for Hiroshima to fulfill its expected role as a hub for international peace, promote Hiroshima’s central functions, such as its research function and its function of gathering and accumulating resources relating to peace

### (1) Build a platform in which various players participate

[Envisioned goal]

A platform in which diverse players participate has been established to assist global peace activities.

[Main path ①]

- Strengthen cooperation with the business community  
Foster momentum for peace in the business world and expand the base of supporters

[Main efforts going forward ①]

- Hold the "Hiroshima Business Forum for Global Peace"  
Strengthen cooperation with the business community (FY2022-2024)
- Hold comprehensive conferences on peace attended by players from various fields  
Hold a conference to comprehensively discuss the realization of peace with the participation of various players  
in addition to the business community (FY2024)

[Main path ②]

- Build the base of activities  
Promote the construction of a platform in which players from various fields participate, starting with the business community

[Main efforts going forward ②]

- Expand the functions of the platform  
With the main purpose of sharing information, launch a platform and promote the activities of its constituent groups and work towards expanded participation in the platform (FY2022-2024)
- Hold comprehensive conferences on peace attended by players from various fields  
Build a foundation for effectively holding comprehensive discussions for the realization of peace (FY2022 - 2024)

[Main path ②]

- Create a community that comprises the platform  
Promote the creation of a community that supports peace activities and engages in such activities independently based on the awareness of various issues

[Main efforts going forward ③]

- Expand the base of supporters by assisting in the creation of the community
  - Discover players from various fields engaged in peace activities toward the creation of a community (FY2022-2024)
  - Encourage participation in the platform (FY2022-2024)
- Hold comprehensive conferences on peace attended by players from various fields  
Expand the peace efforts of each community into global action toward the realization of peace (FY2024)

(2) Enhance the function of disseminating information

[Envisioned goal]

The communication function is strengthened and the website is recognized and utilized as a website that contributes to peace activities

[Main path]

- Improve the content and run further promotions according to the target  
Create content such as web articles that interest and attract target people and run promotions that appeal to those who take little interest in peace activities

[Main efforts going forward]

- Expand the number of people who take an interest in peace activities using online resources  
Expand the base of supporters by disseminating information that appeals to those who are interested in peace efforts but are not actively involved or who take little interest (FY2022-2024)
- Create a foundation for activities utilizing the website  
Consolidate information on peace such as experiences from the atomic bombing and peace education into one website with the aim of having it being utilized by various players working on peace, so that it becomes a foundation for building communities and platforms (FY2022-2024).

(3) Promote the plan to become a hub

[Envisioned goal]

A base for making specific contributions to the realization of a peaceful world free of nuclear arms has been established.

[Main path]

- Maintain and strengthen Hiroshima's central function

Maintain and strengthen Hiroshima's central function to enable continuous peace efforts by the "Hiroshima Organization for Global Peace (HOPe)"

[Functions necessary for a central role]

• Research • Human resources development • Dissemination of information • Creation of a community • Resource accumulation

[Main efforts going forward]

- Establish the organizational foundation of HOPe

Establish an organizational foundation that enables stable and continuous operation by strengthening the management and research functions (FY2022-2024)

- Strengthen the financial foundation

• In order to establish an organizational foundation that enables continuous activities that do not rely on the management resources of the prefecture alone, establish a mechanism to obtain funds in a broad manner from both Japan and abroad, and encourage bequests and contributions from individuals or groups with financial resources around the world (FY2022-2024)

• Utilize funds from foundations, research support organizations, etc. to utilize and further advance the results of research (FY2022-2024)
