Message from facilitator	More than 75 years have passed since the atomic bombings of Hiroshima and Nagasaki, and memories of the war have gradually faded in Japan. On the other hand, the world has seen fierce fighting and civilian casualties increase. What can you do to eliminate these tragic wars? What can we learn from Hiroshima to create a peaceful world? Let's think about these questions with no correct answers with your peers from diverse backgrounds.

Message from Facilitator	Hiroshima is growing to be a place where people come together to learn about peace and take actions. This "Hiroshima Junior International Forum" is one of our efforts. This forum will provide the opportunity for participants to gain new knowledge through lectures by experts. And, at the same time, this forum will be an opportunity to learn from each other's experiences and ideas. I hope that you, the future global leaders will make this forum a place where you will find your "good colleagues" for global peace.

Message from facilitator	Please enjoy the program with your heart and soul. Thinking about difficult problems and acting adhering to your principle is not an easy process. Especially now, as the world is drastically changing (probably to a bad direction), you might be pessimistic. But, in this program, you can find a way to understand each other, a way to have a cooperation. And that might become a first step to change the world in a better direction. Let's challenge together with us.

Message from facilitator	What kind of world do you wish to see 10, 30, and 50 years later? I expect you to make this forum to be an opportunity to think about what are necessary to achieve the world that you envision. Achieving the abolition of nuclear weapons is not an easy task. To start, I hope that you will try to understand why it is difficult, exchange opinions with participants of the same generation from various countries and think together on how to move forward. I look forward to meeting all of you and hearing your creative ideas generated through free exchange of views.
